

RØH / THE DARKROOM REELS

33 IN-ROOM FILM CONCEPTS · THE 30-MINUTE-A-DAY SUSTAIN PLAN

Verticals that rob souls out of the dark: 9:16, 3–20 seconds, shot in your room, graded like film. *See different. Live purposely.*

PART I · THE SYSTEM (EVERY FILM OBEYS THIS)

1. **Format** — 9:16 vertical (TikTok / IG Reels / Shorts). 3–20 sec. 4K 24fps. Phone on tripod.
2. **Exposure** — never shoot pitch black. Underexpose but stay visible; the black comes from the grade.
3. **Grade (DaVinci Resolve, preset once)** — contrast up; shadows crushed to near-black; highlights warm cream (#b9975b); film grain 35mm at 25%; subtle vignette; faint teal in shadows. Save the preset: one click on every reel.
4. **Sound** — whisper-VO recorded in a closet under a blanket (phone mic), or text-on-screen only. Dark ambient loops from the YouTube Audio Library (“dark ambient no copyright”).
5. **Text identity** — every film opens with a BOLD STATEMENT (same font every time, wide tracking). Every film ends on the END CARD: *VERSE TAG* → **SEE DIFFERENT. LIVE PURPOSEFULLY.** → *@RØH*.

IN-ROOM PRODUCTION RECIPE

- **Tripod** — chest height for sitting shots, floor height for flat-lay, face height for POV.
- **Light fallbacks** — window light = key; desk lamp through a white t-shirt = soft diffused key; phone torch = source / rim light; the room switch = instant dark/light cuts.
- **Camera app** — manual lock: 4K24, shutter 1/48, ISO lowest, AE/AF locked (tap-and-hold).
- **Stability** — shoot every shot twice: once moving, once locked (locked = punch-in/zoom in edit).
- **DaVinci Fusion** — build ONE intro-text template and ONE end-card template; reuse forever.
- **Batch shooting** — 90 minutes = 3 films. Shoot all identical camera positions in a row, then move the tripod once.

PART II · THE 33 CONCEPTS

PART III · THE 30-MINUTE-A-DAY SUSTAIN PLAN

Philosophy: **bank before you broadcast.** A 90-minute Sunday block banks 3 films; the week is wiring them out. A full bank runs the movement on autopilot; an empty bank is a dead feed.

DAY	THE 30 MINUTES
SUN	SHOOT: film 1 concept from Part II (15) · snap b-roll / behind-the-scenes (10) · queue next concept (5)
MON	DISTRIBUTE: edit + grade + export with the preset (20) · post/schedule TikTok → IG Reels → Shorts (10)
TUE	COMMUNITY: read Wall embeds in Discord, reply, forward prayer requests (10) · bless 3–5 like-minded accounts (10) · queue 1 Wall quote-card (10)
WED	DISPATCH: draft 1 Buttondown email — drop date or verse meaning (15) · post 1 shareable quote card from the Wall (15)
THU	ORDERS: answer vault embeds, confirm sizes + payments by email (20) · note restock (10)
FRI	PREP: shot-list the next 2 concepts (15) · tidy the shoot corner, check storage + battery (15)
SAT	PUBLISH WEEK: send Dispatch email · update wall.json + Discord · set next week’s 3 targets (30)

Launch burst (weeks 1–2): two 90-minute blocks — bank 10+ films before promoting anything.

Monthly cadence (one design drop / month): film that design (3 weeks) → Dispatch email (“the meaning”) → vault sale → family watch in Discord → next design. Weekly mix: 1 reel · 1 quote card · 1 behind-the-scenes · 1 Wall

highlight.

KPIs (check Saturdays): Buttondown subscribers (+5/wk early) · Wall entries (3+/wk) · follower growth · saves+shares per reel (2–3).

Tools already live: Discord webhook (Wall + vault + Dispatch) · free Buttondown list · curated js/wall.json · the Vault. Most days above are 10-minute tasks, not content grind.

Keep the loop honest. One grade preset, one text template, one end card — no daily design work. Reuse b-roll across weeks (ten 20-sec shots = a month of content). If a day slips, the bank covers it. Never skip SAT without re-setting the week.
